

Shivanshu Gupta

MCA (Artificial Intelligence) Student | Aspiring AI/ML Engineer

Delhi NCR, India | [linkedin.com/in/shivanshu-gupta-6b99b4380](https://www.linkedin.com/in/shivanshu-gupta-6b99b4380) | github.com/sgshiv001

SUMMARY

MCA (AI) student at Bennett University who moved from a business background into software engineering by choice. Foundations in Python and C, with four projects built so far, including an AI-powered stock-order matching system. Working toward a career in AI/ML engineering focused on CUDA and GPU computing.

EDUCATION

MCA, Artificial Intelligence - Bennett University, Greater Noida 2026 - 2028

Coursework: Machine Learning and Pattern Recognition, Advanced Data Structures and Algorithms, Programming for AI, Mathematics for AI, Data Science, Version Control using GitHub

BBA - College of Management Studies, Unnao (CSJM University, Kanpur) Completed

CGPA 7.00, First Division. Semester results improved steadily across the program.

PROJECTS

TradeVelocity - Stock-Order Matching Engine (MCA Semester Project) Python

- Built an order-matching engine using heaps, hash maps and trees, with market-history analysis.
- Added an AI anomaly-detection layer using the Claude API to flag unusual trading patterns.
- Delivered as a Windows desktop app and a local web app with persistent sessions.
github.com/sgshiv001/TRADE-VELOCITY

AI Question Paper Generator - EdTech SaaS MVP React, Claude API

- Built a React app that generates multiple-choice questions by subject and difficulty using the Claude API.
- Added JSON and PDF export and designed a Free / Pro / Enterprise pricing model to validate demand.

InvenTrack - Inventory Management Application JavaScript

- Developed an inventory management app. github.com/sgshiv001/inventrack-inventory-management

AI Feedback Analytics Dashboard HTML, CSS, JavaScript

- Built a self-contained dashboard on real Google Sheets data with a sentiment chart, category bars, an AI insights panel and a filterable table; deployed on Netlify.

SKILLS

Languages and tools: Python, C, MySQL, JavaScript, React, Git and GitHub, Microsoft Office (Word, Excel, PowerPoint)

Currently learning: Data structures and algorithms, machine learning, mathematics for AI, NLP and LLMs, CUDA and GPU programming

Also: Claude API integration, data visualization, video filming and editing (DaVinci Resolve)

CERTIFICATIONS

- Google Foundations of Cybersecurity - Coursera (October 2025)
- Business Analytics - Lakshya IT Solution
- Advanced Financial Accounting - Lakshya IT Solution

ADDITIONAL

- Runs the YouTube channel @shivudailyvlogs (college life, fitness and travel content), handling filming, editing and publishing.
- Learning data structures and algorithms from scratch with a read, rebuild, code and optimize study method.
